

LYNX REVIVAL GROUP (PRELIMINARY)

1. This is a short circular to the few remaining (and still active) users of the LYNX range of microcomputers. The LYNX still has a few followers but there is currently very little support for them. The aims of this new group is to put these LYNX users in contact with each other and to provide a forum for questions, answers, reviews and suggestions through the medium of a disk - based magazine.
2. LYNX REVIVAL GROUP is a free membership hobbyist based group. We are totally open.
3. Magazine distribution will be on LYNX DOS 200K disks for the 96K or 128K LYNX machines supplied by YOU, the user / contributor.
4. For practical reasons, I will only support regular contributors who provide REAL input to the magazine. Those not willing to contribute useful articles can still PURCHASE each issued magazine disk for a 'PUBLIC DOMAIN' style price of £2.50. Regular contributors who do not contribute in one issue are not subject to this and so need not worry.
5. You are asked to contribute software - be it a small demo, a pools forecaster or a few of those POKES we all need to know about - textual reviews and suggestions should be on a LYNX DOS wordprocessor such as LYNXTEXT.128.80. Hardware reviews should also be in this style of format. Hardware circuit diagrams will obviously be on paper (unless one of you can come up with an easy to use CAD drawing program !!!!).
6. All contributors names (and phone numbers) will appear on a file on each disk unless you request me not to include you. The reason for this is that should I go down for any reason you can always contact any of the remaining LYNX survivors.
7. Contributions : INPUT OUTPUT and COSTS :-
 - (i) You to supply disk (with magazine articles on it).
 - (ii) You to supply return postage stamps (and address label, if possible).
 - (iii) I will compile all contributions (and test any software) onto your disk and return it. My costs will be time and effort. Being a free hobby group, you can't possibly expect me pay out for your benefit, so be sensible in your requests.
8. ADVERTISING WILL BE ACCEPTED for LYNX and LYNX related equipment free of charge. The purpose of this is to allow any other LYNX users the chance to buy up any good bargains which they may be seeking. These could include monitors with cables to a Lynx, or printers with cables, or any Lynx specific hardware such as disk drives, joystick interfaces, etc.
9. MAGAZINE DISK ISSUE 1. release date 24th AUGUST 1988.
CONTRIBUTIONS to reach me by :- 17th AUGUST 1988.
10. ME :- JOHN KOUSHAPPAS
